Municipal Farm

last update: June 6, 2015

The Municipal Farm Sustainable Reuse Plan is an EPA pilot project for the historic, 441-acre Municipal Farm site. Currently owned by the City of Kansas City, Missouri the property sits within the Eastwood Hills Neighborhood.

Many stakeholders and community members have been involved in the process to create the Plan which calls for many uses and activities on the site including creating a connection to the Blue River, recreation trails, nature-focused educational facilities, urban agriculture, residential and mixed use development, and sustainable industrial and institutional facilities.
